CLAIM

2 I CLAIM:

3 A new and distinct variety of cherry tree, substantially as illustrated
4 and described, that is most similar to the 'Glenred' (United States Plant
5 Patent Number 12,859) cherry by producing cherries that are large in
6 size, oblate in shape, firm in texture, dark red in skin color, red in
7 flesh color, and sweet in flavor, but is distinguished therefrom and an
8 improvement thereon by blooming about three days later, by producing
9 cherries that ripen about nine days later, and by being a pollinator for
10 both the 'Glenred' and 'Tulare' (United States Plant Patent Number 6,407)
11 cherries.
